

MT. JULIET FIRE DEPARTMENT

2024 Annual Report

SERVICE - DEDICATION - EXCELLENCE

MT. JULIET FIRE DEPARTMENT

A MESSAGE FROM YOUR MT. JULIET FIRE CHIEF

I am pleased to present the 2024 Annual Report for the Fire Department of Mt. Juliet. As you will see in the pages that follow, it has been a remarkable year for our department. Highlights include celebrating our employees and community partners at our inaugural annual awards ceremony, training and licensing twelve new Emergency Medical Technicians (EMTs), breaking ground on the new Station 3, and so much more.

The vision of our department—Service, Dedication, Excellence—guides everything we do. In Service, we perform all duties with both competency and compassion. In Dedication, we are committed to our craft, steadfast in our duties, and unwavering in our devotion to our community. In Excellence, we continuously strive to surpass standards and raise the bar in every facet of our work. In 2024, our department truly exemplified these values in every way.

Throughout this report, you will find numerous accomplishments from each of our divisions, as well as impressive statistical data. However, what cannot be quantified in this report are the countless lives saved, the increased quality of life for our citizens, and the property damage we've mitigated. These are the invaluable, often unseen actions our personnel carry out every day in service to our community.

I would like to extend my deepest gratitude to City Manager Kenny Martin and the entire city management team for their unwavering support of our department. Additionally, I thank Mayor James Maness, Vice-Mayor Bill Trivett, Commissioner Art Giles, Commissioner Scott Hefner, and Commissioner Jennifer Milele for their continued dedication to making Mt. Juliet the safest city in the world.

Sincerely,

Mark A Foulks

FIRE INVESTIGATIONS

The Fire Department of Mt. Juliet responded to 4717 calls for service requiring a response in 2023. The bar chart above breaks down the 4717 incidents into categories based on the National Fire Incident Reporting Systems (NFIRS).

100 Series (Fires) is generally what most people think of when they picture a fire department. This includes all structural, wildland, rubbish, and vehicle fires.

200 Series (Overheat, No Fire) pertains to situations where machinery or vehicles overheated and created a hazard but were not physically on fire at the time of arrival by fire department personnel.

300 Series (MVA/Rescue/EMS) includes motorized vehicular accidents (MVAs) as well and any other type of rescue incident and Emergency Medical Service (EMS) responses.

400 Series (Hazardous Conditions) pertains to incidents including Carbon Monoxide incidents, hazardous material spills, leaks, and power lines down.

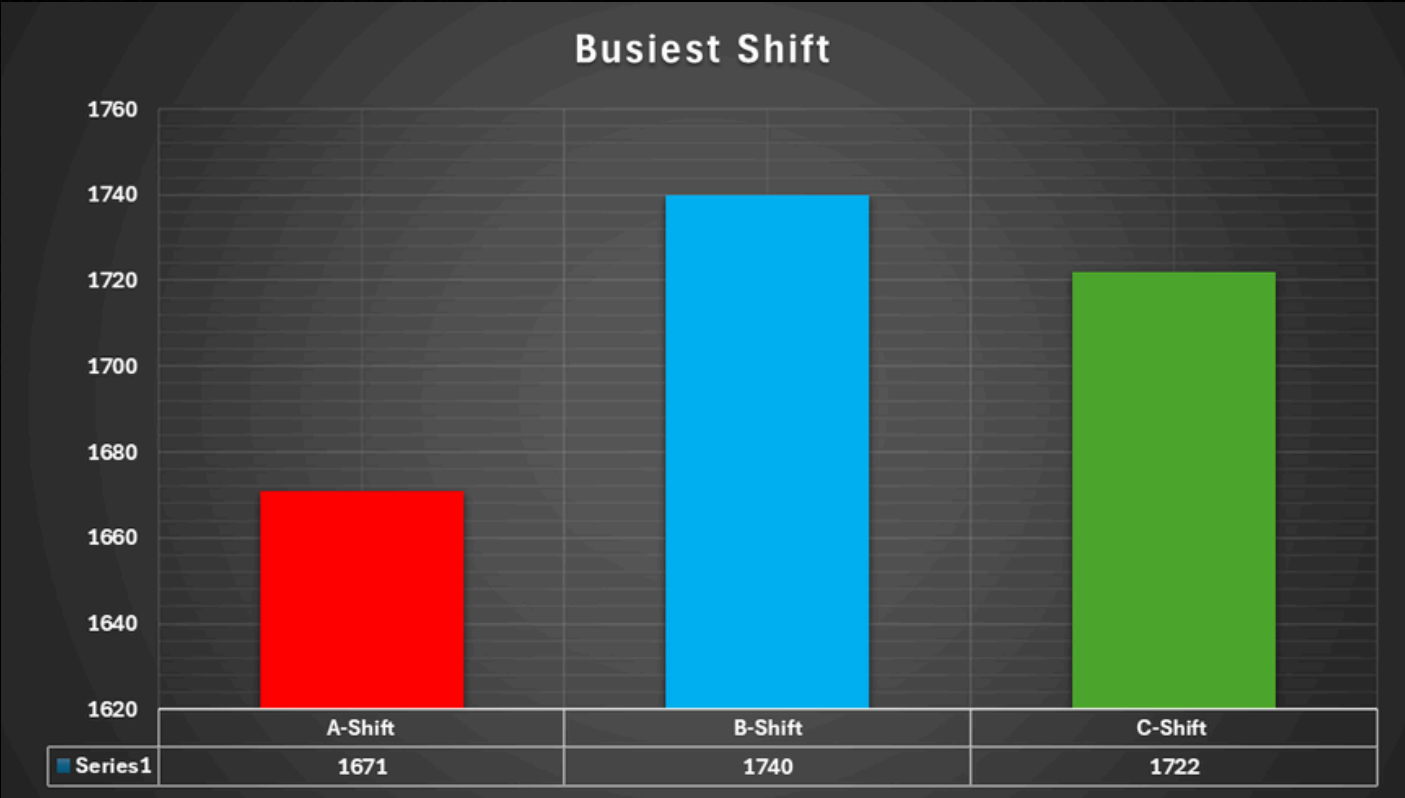

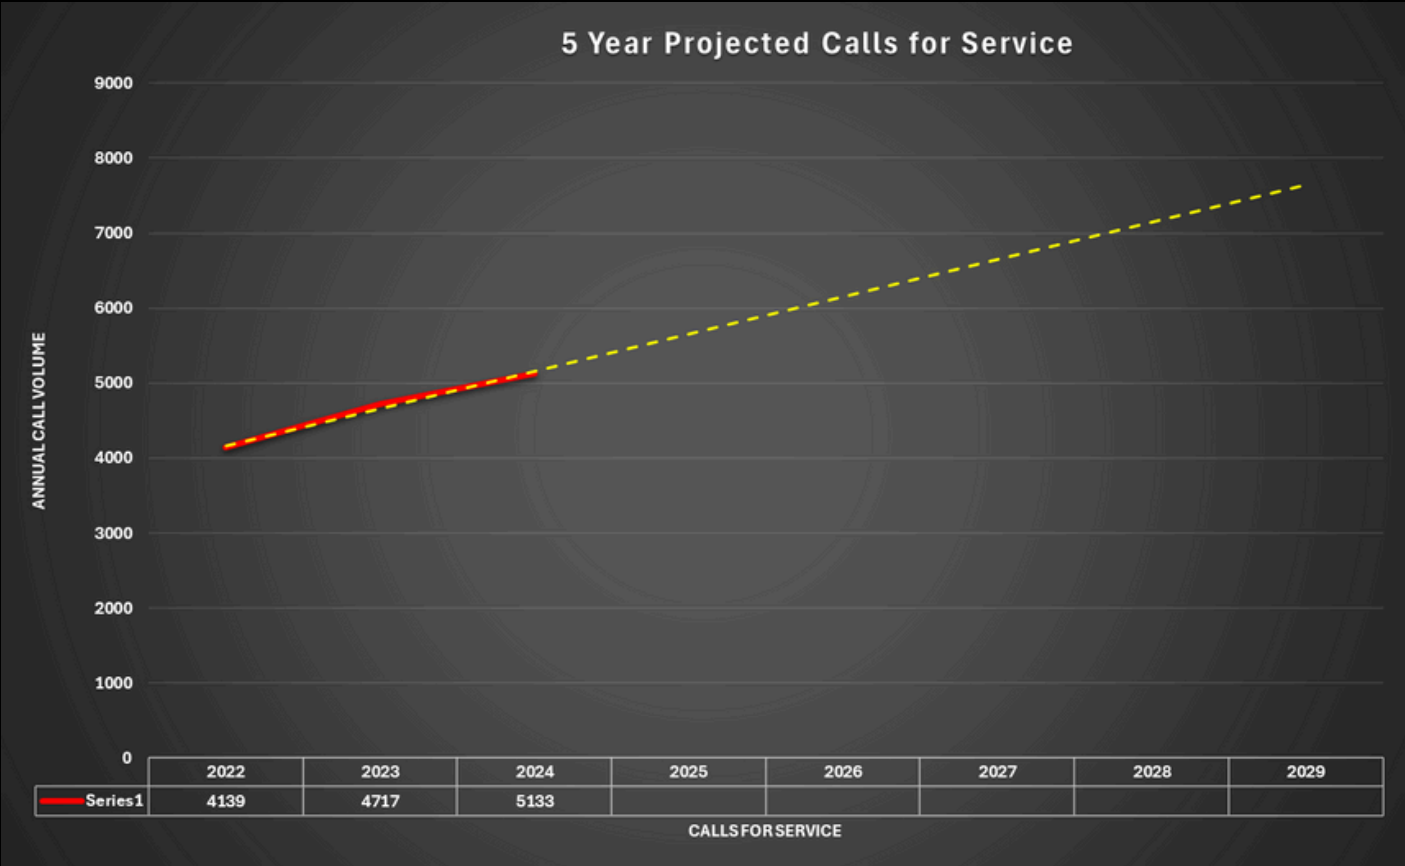

500 Series (Service Calls) includes water and steam leaks, citizen complaints about open burning, assistance requested by MJPd for traffic control, and public service requests of various nature.

600 Series (Good Intent Calls) refers primarily to incidents received for odors of smoke that result in no problem found and incidents when the fire department is canceled by another agency before arrival on the scene.

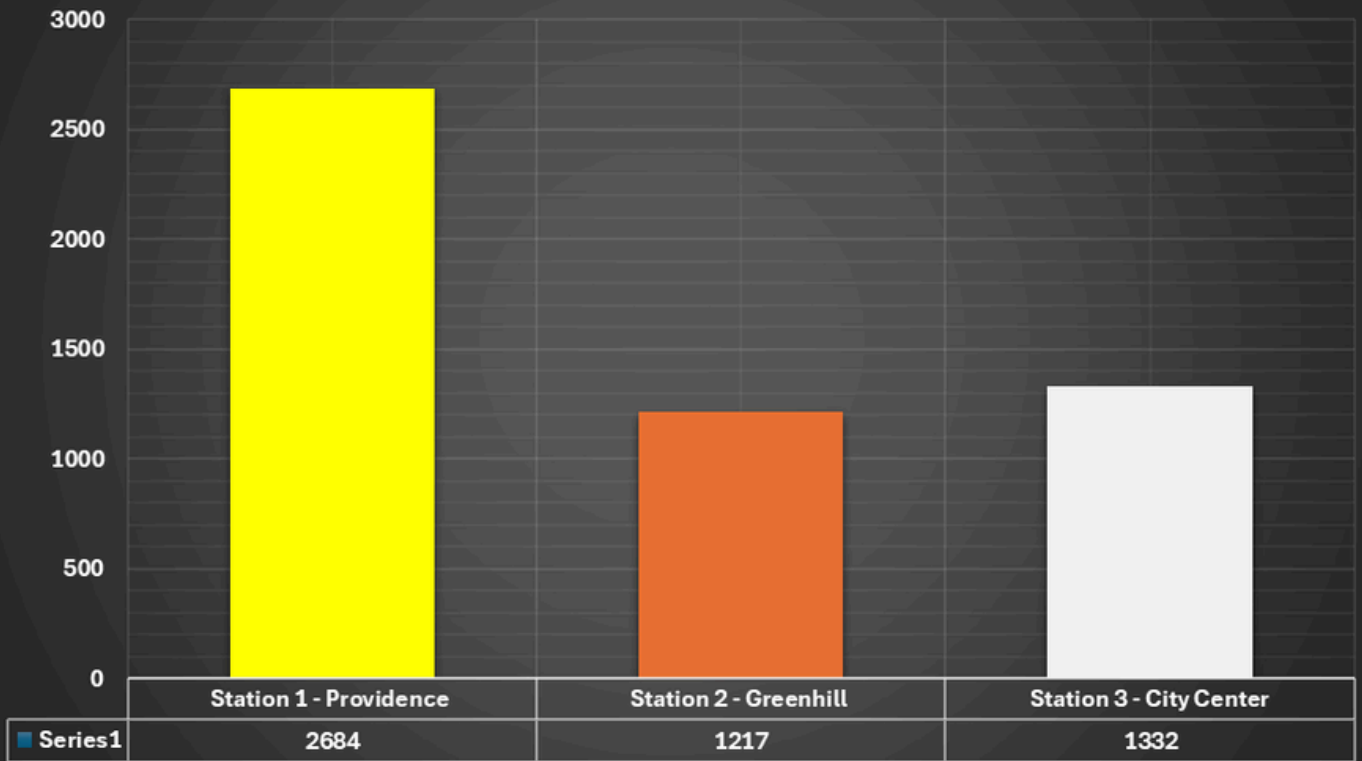

700 Series (Fire Alarms, False) includes all fire alarms responded to where no fire was found upon arrival

800 Series (Severe Weather, Natural Disaster) includes all-weather and natural disasters where no other incident types are present.

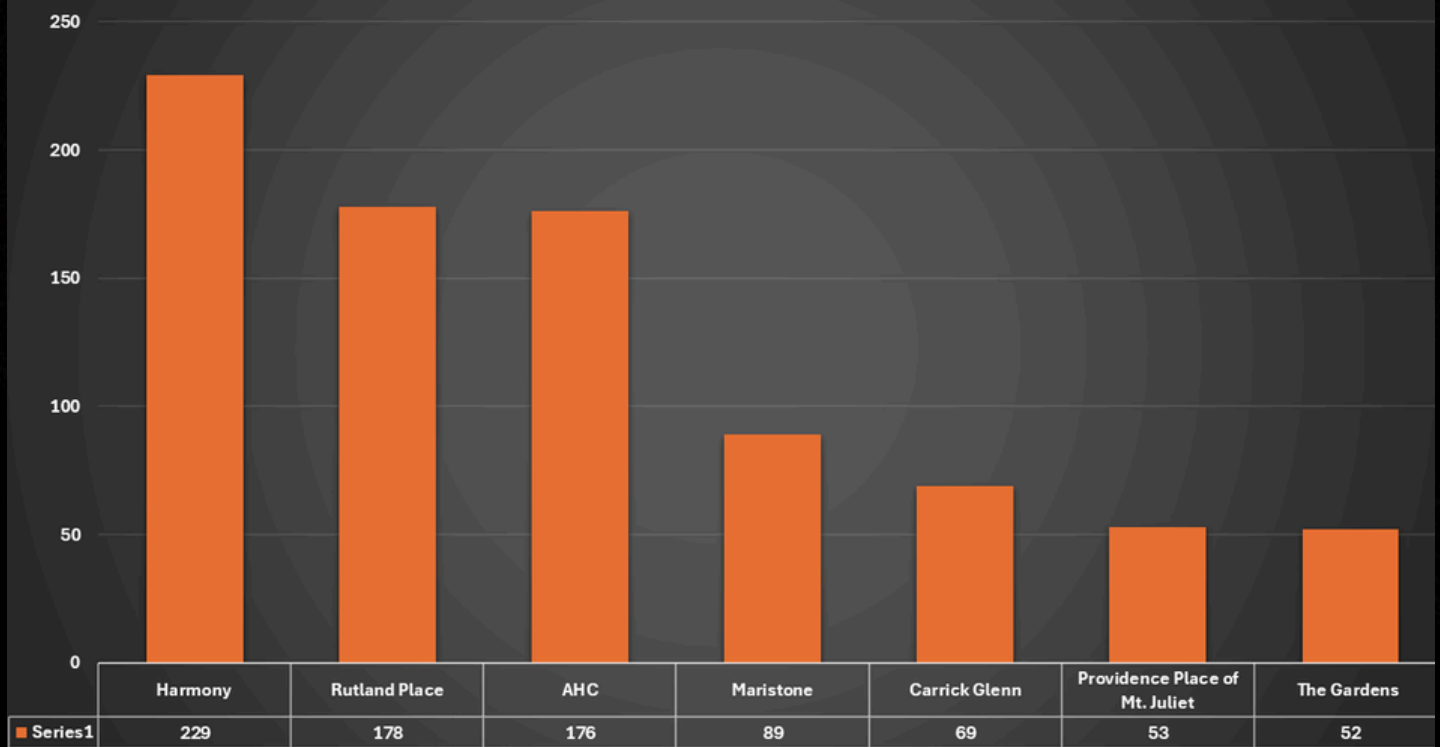

900 Series (Special Incident) includes citizen complaint, which includes code violations.
